

Brewora

Modern Coffee Experience - UI/UX Project Case Study

A heritage-inspired coffee experience focused on menu discovery, storytelling, and mood-based recommendations

Project Detail

Information

Project Type	– UI/UX — ordering kiosk Application
Project Name	– Brewora
Primary Domain	– Food & Beverage
Role	– UI/UX Designer
Primary Tool	– Figma

1. Project Overview

Brewora is a coffee-house web experience designed to make discovering coffee feel more engaging and memorable. Instead of presenting users with a plain list of drinks, the concept combines menu browsing, brand storytelling, and mood-based recommendations in one experience.

Design goal

Create an engaging coffee discovery journey that combines clear browsing, brand atmosphere, and mood-based recommendations.

2. Problem Statement

Digital coffee menus can feel repetitive and purely transactional. Users may need to browse many options without a clear way to discover a drink that matches their current preference or mood. Brewora explores how visual storytelling and guided discovery can make the experience feel more personal.

3. Target User & Persona

Category	Details
Profile	– 24-year-old young professional / frequent café visitor
Goal	– Find a coffee that matches her mood and preferences without spending too much time choosing
Needs	– Clear menu categories, simple drink information, personalized recommendations, and an enjoyable browsing experience
Pain Points	– Too many choices, unfamiliar drink names, difficulty deciding what to order, and generic menu experiences
Expectation	– A simple, engaging, and personalized coffee discovery experience

4. User Problems & Design Opportunities

Problem	Design Opportunity
Too many choices	– Simplify menu discovery
Hard to decide what to order	– Add mood-based recommendations
Generic digital menus	– Create a more engaging experience
Unfamiliar drink names	– Add clear drink descriptions

5. Information Architecture

The information architecture is organized around the user's main tasks

- Home
- Menu
- Classics
- Signature
- Iced
- Mood Brews
- Refreshers
- Drink Details
- Mood Selection
- Mood Recommendation
- Search
- Profile
- Brew This / Order

6. Main user flow

Home → Explore Menu → Choose Category → Select Drink → View Details → Brew This / Order

7. Key Features

Menu Discovery	– Explore coffee categories easily.
Drink Details	– Clear descriptions for each drink.
Mood Brew	– Get coffee recommendations based on mood.
Personalized Recommendations	– Discover drinks suited to you.
Brew This	– Quick action to choose a drink.
Brand Storytelling	– Explore Brewora's coffee heritage.

8. UI Design System

Color	Hex	Use
Deep Brown	#4A302D	Primary brand / accent
Warm Cream	#F3E9D6	Background / secondary
Coffee Black	#1E1B1A	Text / readability
Light Neutral	#FFFFFF	Cards / surfaces

Visual Language

- Warm, premium coffee-inspired visual style.
- Clean cards with clear drink information.
- Deep brown accents for important actions.
- Cream backgrounds for a comfortable feel.
- Image-led presentation for coffee discovery.

9. Design Process

Stage	Focus
Research	– Understand users and coffee discovery needs
Define	– Identify key problems and opportunities
Ideate	– Develop menu and Mood Brew concepts
Design	– Create wireframes and visual UI
Prototype	– Build the interactive experience in Figma
Refine	– Improve layout, usability and visual consistency

10. Accessibility & Usability Considerations

- Clear and readable typography
- Good color contrast
- Simple and consistent navigation
- Clear categories and CTAs
- Minimal steps to find a drink
- Consistent layouts and spacing

11. Project Outcomes

Brewora creates a simple and engaging coffee experience by making menu browsing easier and helping users discover drinks based on their mood. It combines clear product information, personalized recommendations, and brand storytelling in one experience.

12. Future Improvements

- Add complete online ordering and checkout.
- Expand mood and preference-based recommendations.
- Improve mobile responsiveness.
- Add micro-interactions and smoother animations.
- Conduct user testing to further improve usability.

13. What I Learned From the Project

- Improved my UI/UX design skills.
- Learned to create a clear visual hierarchy.
- Understood user-focused menu design.
- Learned to design personalized recommendations.
- Improved my Figma prototyping skills.
- Learned how to combine branding with functionality.

how are you feeling today

😊 Mood Detected: Happy

Strawberry Latte

A delightful blend of creamy milk, smooth espresso, and sweet strawberry for a refreshing, cheerful sip.

Because happiness tastes even better with a hint of strawberry.
